

Timetabled lessons:

2 full days per 10 day cycle.

This course has been designed to offer selected units at Marist Regional College that focus on and provide an overview of the nursing and health sectors in general. It offers a range of applied learning approaches that address workplace health & safety, communicating and working in the health sector, anatomy & physiology, medical terminology, infection control and first aid.

The units are delivered using a blend of knowledge-based learning, online resources and practical activities.

Please note that this introductory course does not lead to an ATAR, nor entry into a Bachelor of Nursing at University.

Students must complete the following areas to competency standards:

- 100% completion of theory
- 100% completion of practical based work

A student will receive a Statement of Attainment for completed units and points will go towards their TCE.

Introduction to Nursing and Health Occupations

What will I gain from completing this VET short skill set?

This course includes units that are part of the Health & Community Services Training Package.

This skill set will provide you with skills and knowledge that may lead to a career in the health industry or further studies.

This may be in a direct support or health professional role, or working with people to improve their health and wellbeing.

This course will provide an understanding of the career as a Nurse, but is not part of the Bachelor of Nursing training, which can only be studied at a University level.

VET courses do not support Literacy, Numeracy or ICT ticks.

What will I learn?

- Communication skills
- Body systems
- Infection control
- Medical terminology
- First Aid

Pre-requisites:

Interviews will form part of the enrolment and selection process.

Delivery time-frame

Over 1 year.

Post-secondary pathways/suggestions:
